The Polimex Group won a contract to provide services for the MPO

02/05/2015

The consortium of Polimex Power Industry and Polimex-Mostostal has been selected for the organization and operation of the industrial service in the OUZ-2 Department of the Municipal Cleansing Services of the City of Warsaw (MPO).

The services will include the maintenance of power, water, heating and plumbing systems, maintenance and support of equipment subject to the provisions of the Office of Technical Inspection, as well as the maintenance of electrical networks and lightning protection systems. Other services requested by the Municipal Cleansing Services of the City of Warsaw are also envisaged to be provided.

The contract is worth more than PLN 12.7 million. The delivery period is to be the July 31, 2017. Four companies competed in the tender.

Polimex Power Industry is one of the new companies of Polimex-Mostostal, which acquires new energy projects, orders for modern installations in the field of environmental protection and installation services. It also participates in the implementation of the Group's strategic contract, i.e. the Kozienice Power Plant.

Polimex-Mostostal SA has transformed its organizational structure. The effect is a holding company, Polimex-Mostostal. Two new companies have been separated from Polimex-Mostostal SA, they shall continue the PxM operations. Polimex Power Industry operates in the energy sector, and Naftoremont-Naftobudowa in the chemical and petrochemical industry.

All and any of the competences of the Power Industry segment are now with the new company. Polimex Power Industry has all of the existing PxM resources available, including equipment and the design competence base, as well as references of Polimex-Mostostal SA.
