

Antwerp, 15/02/21

Reference: BASF CAPEX projects 2018 to 2020

Dear Mr. Paszyński,

Naftoremont/Naftobudowa (NN) has performed very well on several CAPEX projects that were related to several investments and shutdowns at BASF Antwerpen in the period from 2018 to 2020, and still ongoing. For these projects combined, NN had a total revenue of 10,5 mio EUR cumulated at piping prefabrication and installation for production chemical plants. During this period BASF could count on a highly qualified site team which was able to go to peak moments with more than 100 workers and 14 welders were active on site.

NN successfully made all the deadlines that were communicated in advance. NN always proves to be very flexible and is a reliable partner for BASF in execution of CAPEX projects with focus on complex shutdown activities.

Sincerely

Nick Verbouw
Teamlead Piping & Mechanical Construction
BASF Antwerpen nv
