The National Board of Appeal dismissed an appeal against the choice of the tender submitted by the consortium of Polimex-Mostostal for constructing the unit in Kozienice as the most advantageous

07/31/2012

On Friday, 27 July, The National Board of Appeal dismissed the CNEEC-COVEC's appeal against the selection of the tender of the Polimex-Mostostal consortium as the most advantageous one for the construction of coal unit for supercritical parametres up to 1000 MW in ENEA Wytwarzanie S.A.

The tender was submitted by a consortium consisting of:
Hitachi Power Europe GmbH - the leader,
Polimex-Mostostal SA– the partner.

Net value of the offer is 5,105,386,417.00 PLN,
Gross value of the offer is 6,279,625,292.91 PLN.

Polimex-Mostostal participation in the work amounts to 42.7%, which is 2,681,400,000.00 zloty gross, 2,180,000,000.00 zloty net.

The main scope of work performed by Polimex-Mostostal includes:
- construction of power unit,
- assembly of power unit,
- installation of power output from the unit,
- installation of the unit water cooling system,
- implementation of auxiliary systems of the unit,
- organization of construction site.

Polimex-Mostostal will also participate in project work.

- With great satisfaction we adopted the information that our offer in the tender for the construction of a power unit for supercritical parameters in ENEA Wytwarzanie S.A. was chosen by the Employer as the most advantageous one. The National Board of Appeal dismissed the protest of the Chinese bidder in the tender for the construction of the power unit in Kozienice won by Polimex-Mostostal. In this situation, we will be able to sign the contract in the coming weeks. In this way, our orders received increased by more than 2 billion zloty - Konrad Jaskóła informs, the President of the Board, CEO of Polimex-Mostostal Public Limited

- This contract will be the next big power engineering order, after our signing the agreement to build two power units in Opole Power Plant. Both of these projects have great importance for the development of the Polish power industry - the President Jaskóła explains.

Polimex-Mostostal, as a national leader in the implementation of industry investments, has been developing operating in the energy sector for a number of years. We have appropriate skills, experience and potential necessary for the comprehensive implementation of large, technologically advanced energy projects.
Polimex-Mostostal has realized turnkey constructions of many sites in Polish and EU professional, industrial and municipal power engineering.

In preparation for the implementation of major energy projects Polimex-Mostostal was gradually strengthening its ability to complete projects in this sector. Within the range of Polimex-Mostostal offer there are: organization and realization of investment projects, conducting start-ups of installations and maintenance services.
