Przedsiębiorstwo Robót Inżynieryjnych PRInż1 provides services regarding road construction and road as well as sanitation infrastructure, and Polimex-Mostostal

plans to continue the current activity of the company.

We are accelerating the process of optimisation of Group operation by means of the longrealised restructuring. It covers mergers of selected companies in segments in which Polimex remains active as well as consolidation of small design companies. We are aiming at furtherincreasing effectiveness and optimisation of Group operating costs. Transfer of the ownership of the PRInż-1 shares is part of the plans regarding simplification of the Polimex-Mostostal Capital Group structure, informs Konrad Jaskóła, President of the Management Board of Polimex-Mostostal.

Sales realised by Polimex-Mostostal in the road and railway market continue to grow. In the recent period, Polimex acquired and realised important road and railway investments, and new significant contracts are being signed. Perspectives for the industry are good. In the coming years, we expect extending the scope of works and the number of tenders, among others in connection with the preparations for Euro 2012. This provides companies such as Polimex with great opportunities, adds Konrad Jaskóła.
