New contract with TOTAL Raffinaderij Antwerpen for the renovation of installation U31 for catalytic cracking

10/01/2019

Naftoremont-Naftobudowa Sp. z o.o., an entity of Polimex Mostostal Capital Group, has concluded an agreement with its long-standing business partner TOTAL Raffinaderij Antwerpen for the renovation of installation U31 for catalytic cracking at the refinery in Antwerp.

The scope of the planned investment involves mechanical works, prefabrication and assembly of pipelines surrounding the installation. The preparation period and prefabrication will start already this year. The main mechanical works will be performed during the TA2020 maintenance shutdown.

The initial estimate of the cost of these works is EUR 3,154,387.09.

Over the last few years Naftoremont-Naftobudowa has systematically implemented renovation, modernization and investment projects for TOTAL. The cumulative value of these projects exceeds PLN 250 million.

The agreement concluded on 25 September is another milestone in the co-operation between the companies and a token of recognition for Naftoremont-Naftobudowa as a reliable and proven partner. Naftoremont-Naftobudowa has earned the trust of major domestic and foreign clients through the work of our highly qualified personnel who have accumulated their experience on the construction sites in Poland, across Western Europe and in the Middle East.
